OpusData Movie Data Extract Sample

This archive contains sample spreadsheets of our Standard Extracts.

The **Basic Extract** offering provides metadata on films (genre, production method, cast and crew, production companies, production countries, etc.) and aggregate financials (total domestic and international box office, total DVD and Blu-ray sales, production budget, opening weekend revenue, etc.).

The **Full Extract** offering adds time-series data for daily, weekend and weekly box office; and weekly DVD and Blu-ray sales.

The Standard Extracts cover over 14,000 movies released or re-released since 1997 for which we have any domestic or international theatrical or video revenue numbers**.**

These samples cover a few movies from the middle of that set.

Samples of each are contained in the "Basic Extract" and "Full Extract" directories contained in the archive.

The content of the extracts is described in detail in the OpusData documentation at

http://www.opusdata.com/documentation/index.php/Database_Extracts

The sample extracts can be downloaded from
